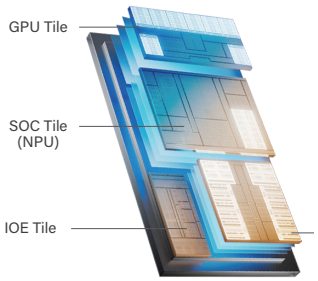
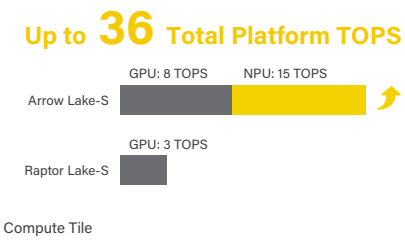
Next-Generation
Edge AI Computing Performance

The Intel® Core™ Ultra 200S series processors deliver up to 36 TOPS of AI computing performance through an integrated CPU, GPU, and NPU. This design, specifically for AI acceleration, delivers more than a 3.5x improvement over the previous generation platform.



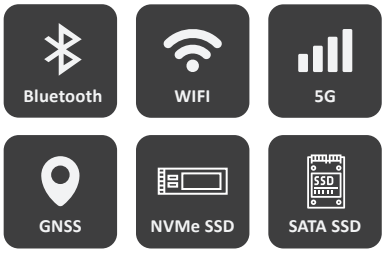


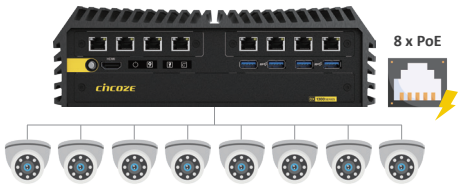
Compact Chassis

Measuring only 242 x 173 x 75mm, the compact chassis has a footprint comparable to an 11-inch iPad. This enables flexible deployment in space-constrained environments such as control cabinets, equipment interiors, or in-vehicle systems.

Rich & Versatile Expandability

Multiple built-in M.2 B/E key slots offer flexible support for wireless communication modules (5G, GNSS, Wi-Fi, Bluetooth), high-speed storage (NVMe SSD), and high-capacity storage (SATA SSD). It also supports I/O expansion modules, allowing for versatile configurations tailored to specific application needs.





Stable, High-speed Data Transmission

Fast and reliable data transmission is crucial for applications such as image capture and surveillance. The DX-1300 supports multiple high-speed I/O ports, including 10/2.5/1 GbE LAN and USB 3.2. It can be expanded to support up to 12x LAN ports or 8x PoE, effectively simplifying cabling.

Rugged & Multi-vertical Certifications

The rugged design of the DX-1300 complies with military standards (MIL-STD-810H), railway certifications (EN 50121-3-2 & EN 45545-2), ensuring reliable operation in various harsh environments.
